

SOLUTION

1. Create a 3×3 board with empty spaces.
2. Assign **X** to Player 1 and **O** to Player 2.
3. Display the board after every move.
4. Ask the current player to select an empty position.
5. Place the player's symbol in the selected position.
6. Check all rows, columns, and diagonals for three identical symbols.
7. If a player gets three symbols in a row, declare that player as the winner.
8. If the board is full without a winner, declare the game a draw.
9. Otherwise, switch to the other player and continue.
